

(Unclassified // FOUO)

CSWC Operational Period Summary

1800 February 17 2018 to 0600 February 18 2018

The Temple of the Forest Beneath the Clouds is the oldest continuously used Chinese temple in California (Weaverville, Trinity County). On display are art objects, pictures, mining tools, and weapons used in the 1854 Tong War. This Taoist temple is still a place of worship and a fascinating look into the role played by Chinese immigrants in early California history. The temple was built in 1874 as a replacement for another that had burned.

### 911 Outages/Remote/Community Isolations:

- None reported.

### Service Interruptions:

- None reported.

# WEATHER OF CONCERN

## Weather of Concern

- A very cold low pressure system will dive southward from Western Canada through to California Sunday into Monday. This system has the potential to bring the coldest air we have seen so far this winter season, with snow levels potentially falling as low as 1500 feet on Monday. With this storm falling over the holiday weekend, there could be significant travel impacts with possible road closures and delays.
  - Low elevation mountain roadways that could be impacted by snow showers, icy roads, and strong winds include Interstate 5 near the Grapevine, Highway 14 through Soledad Canyon, and Highway 33 above Ojai.

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# WEATHER SYNOPSIS BY REGION

## **NORTHERN CALIFORNIA**

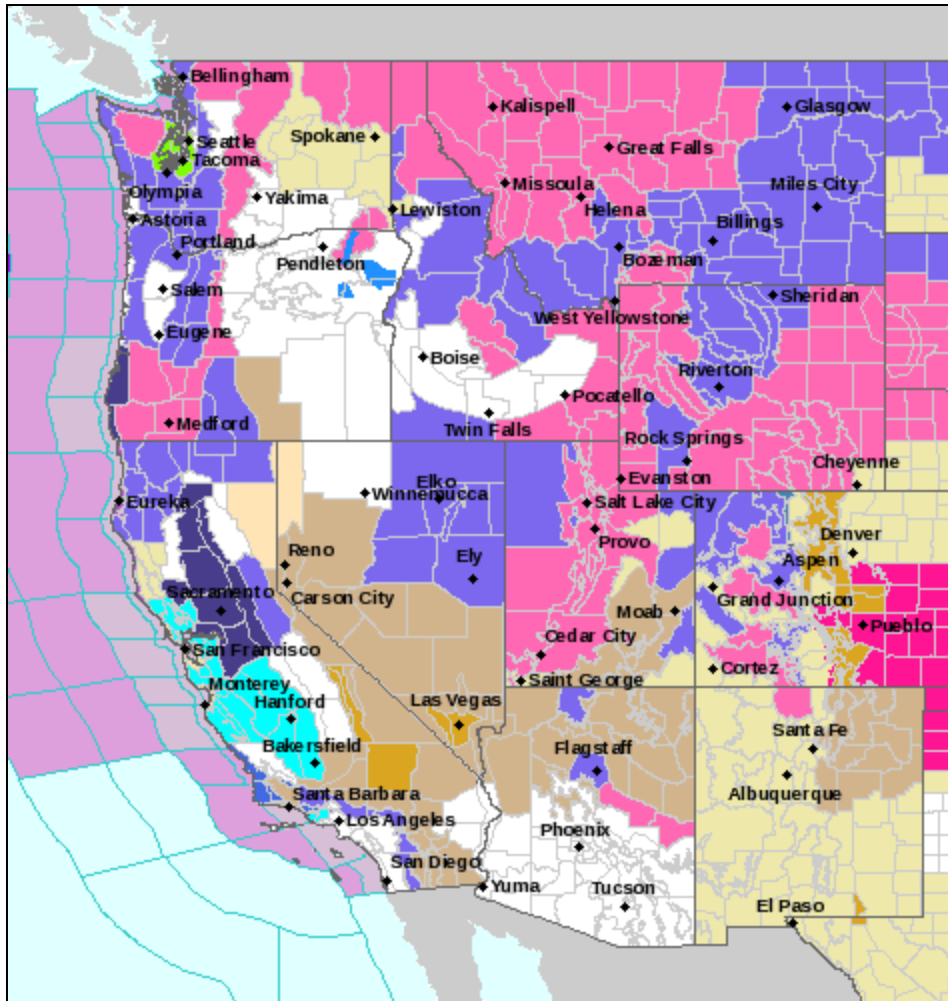

A cold weather system brings breezy winds and snow over the mountains and foothills Sunday into Monday, impacting travel. This will be followed by near record cold temperatures with a possible widespread freeze. The eastern Pacific ridge has begun to retrograde westward as a shortwave trough slides southward along the Pacific Northwest. Skies remain mostly clear across interior Northern CA, though a few light radar returns are being detected just north of our county warning area. South winds / onshore flow has begun to pick up this morning across much of the region ahead of the cold front. These winds are keeping the boundary layer well-mixed: temperatures are running several degrees warmer than 24 hours ago.

## **SOUTHERN CALIFORNIA**

An upper level trough will bring tremendous cooling to the area through Monday, with areas of gusty winds. Temperatures will be down to near normal levels today, then will be significantly below normal Monday. Some light measurable rain and mountain snow is expected across Los Angeles County and northern Ventura County tonight. There is a slight chance of rain showers and snow showers in many areas Monday, and snow showers may even occur in the foothills. Widespread frost or freezing temperatures will affect much of the region Monday night. It will remain very cool across the forecast area through the week. Low clouds were beginning to develop in coastal areas this morning. Clouds will probably remain confined to the coast plain this morning. Otherwise, skies should be sunny today, possibly becoming partly cloudy by evening.
